## All-Inclusive IT & Security: Why Bundled Beats Bolted-On

Intelligent iT | Unified Core

### The Hidden Cost of Point Solutions

Most organizations manage 15-25 separate IT and security vendors. While each tool solves a specific problem, together they create the "patchwork trap": fragmented data, extended incident response times, and significant hidden costs. Integration requirements, vendor management overhead, and extended detection/response timelines add 35-45% to effective IT spending compared to unified platforms.

### Why Unified Platforms Win

A unified architecture delivers instant advantages: real-time threat correlation across all systems, single-platform management, intelligent automation based on comprehensive data, and consistent security policies. Organizations implementing unified platforms report 60-80% faster incident response, 25-30% cost reduction, and 65% fewer security incidents than fragmented competitors.

### Total Cost of Ownership Reality

When factoring all costs—licensing, integration, vendor management, incident response, and compliance—unified platforms deliver 35-45% lower five-year TCO. The Unified Core platform consolidates 8-12 typical point solutions into one integrated environment, eliminating integration complexity while improving security outcomes.

### Business Impact

Beyond cost reduction, unified IT and security deliver measurable business value. Organizations reduce mean time to detect breaches from 206 days to 21 days, experience 40-50% fewer unplanned outages, and improve productivity by 15-25%. A mid-size organization typically realizes \$140,000-\$180,000 in annual savings plus \$400,000-\$750,000 in avoided breach costs.

### Key Statistics

Metric	Impact
3x longer	Mean time to respond with fragmented tools
60-80%	Faster incident response with unified platform
35-45%	TCO reduction vs point solutions
25-30%	Annual cost savings through consolidation

**65% fewer**

Security incidents with unified platform

## **Ready to Transform Your IT?**

The Unified Core platform is designed to help organizations eliminate fragmentation, reduce costs, and improve security. Contact Intelligent iT today to discuss how Unified Core can transform your IT operations.
