Why Most Businesses Are Over-Paying for Under-Protection

Intelligent iT | Unified Core

The Paradox

Organizations spend \$125,000-\$180,000 annually on IT security but remain underprotected. Why? Eight different tools provide overlapping but incomplete coverage, creating gaps. Organizations are overspending on components that don't integrate while remaining exposed to threats spanning multiple vectors.

The Protection Gap

Typical spending covers firewalls (external threats), antivirus (malware), email (one vector), identity (access control), monitoring (detection), vulnerability management, DLP, and backup. Gaps: no threat intelligence integration, no cloud coverage, no coordinated response. Result: 40% comprehensive protection despite substantial spending.

Consolidation Creates Efficiency

Unified platform: 49% cost reduction (\$88,000 annual savings for typical organization) plus dramatically better outcomes (90% protection vs. 40%, 4-6 hours faster detection, automated response). Better protection, lower cost—consolidation achieves both.

Right-Sized Security

Eight core security functions (perimeter, endpoint, network monitoring, identity, threat detection, backup, vulnerability management, threat intelligence) consolidated into integrated platform eliminate redundancy, reduce cost, and improve outcomes.

Key Statistics

Metric	Impact
63%	Of organizations believe security posture is strong
43%	Of organizations experience breach within that same year
40%	Comprehensive protection delivered by typical fragmented stack
90%	Comprehensive protection delivered by unified platform
49%	Cost reduction through consolidation

Ready to Transform Your IT?

The Unified Core platform is designed to help organizations eliminate fragmentation, reduce costs, and improve security. Contact Intelligent iT today to discuss how Unified Core can transform your IT operations.
